Changes to MBS Items for Cardiac Imaging

From 1 August 2020 changes will be made to MBS items for cardiac imaging services to better clarify the clinical requirements and circumstances where this testing and repeat testing is appropriate.

With 30 new items, nine items have descriptor changes and 18 items have ceased.

Further information is available on the safe and best practice [cardiac imaging services factsheet](#) page.

The full list of changes to the MBS commencing on 1 August is available at [here](#).

30 July 2020.
